Improvements

Spring 2011

The Missouri Department of Transportation invites you to celebrate the completion of a \$6.7 million project to build a bicycle and pedestrian attachment on the U.S. 54 Eastbound/ U.S. 63 Northbound Missouri River Bridge in Jefferson City, Mo.

A ribbon-cutting ceremony will take place on Friday, April 8, 2011, at 10:30 a.m. at the Missouri Department of Conservation Carl R. Noren Public Fishing Access area on the north side of the river. See the enclosed map for details.

The new bridge attachment is eight feet wide and includes two look out points with a view of the Missouri State Capitol. The ramp structure on the north side of the river allows access to the Katy Trail. The attachment will provide a safer and more convenient way for people to walk and bike across the Missouri River from the Katy Trail to downtown Jefferson City.

The City of Jefferson, Department of Natural Resources, Missouri State Parks Foundation and MoDOT partnered to construct the project.
